

# **GPS Disciplined Oscillator (OCXO) & Time Reference**

# Features

- Sine wave or CMOS/TTL output
- Short term stability <2 x10<sup>-12</sup> at 1sec
- Accuracy to 25ns RMS UTC
- Ultra Low phase noise -115dBc at 1Hz
- National & International Traceable Reference consumption

## Description

The E8-Y provides a stable and accurate calibration free GPS time & frequency with multiple outputs signal formats is a cost effective solution for applications require frequency reference. This reference maintains high time and frequency accuracy required for demanding applications.

The E8-Y provides low noise, traceable, calibration free time & frequency reference. These time & frequency standards maintain high time & frequency accuracy required for demanding applications. The E8-Y may be considered as a primary reference clock.

# **Applications**

- <1x10<sup>-12</sup> frequency accuracy
- No Drift
- 50ns 1PPS accuracy to UTC
- RS232 NMEA NTP Time Reference
- Excellent holdover performance
- No Calibration
- Excellent holdover performance up to measurement time up to 1000s
- National & International traceable reference
- Time and frequency standard for calibration & RF laboratories

### Standard configuration:

1 x 10MHz sine BNC connector, Phase noise option 1, Short term stability option A x 1PPS BNC connector Data & Settings: RS232 and USB See options to add Ethernet port and NTP server

### **Related frequency reference products**

- E8000: Low Noise 1U 19" rack mount GPS disciplined OCXO up to 12 output, 1 to 100MHz
- E8010: Low Noise 1U 19" rack mount GPS disciplined rubidium up to 12 output, 1 to 100MHz
- E80-GPS: Low cost and Low Noise Desktop GPS disciplined OCXO 1 to 4 outputs
- E8-X: Low cost Desktop GPS disciplined TCXO 1 to 4 outputs

# **E8-Y Specification**

| Option 92:        | IRIGB003, IRIGB123. Specify                          |

Contact us to configure this product to meet your requirement. Designed and manufactured in the U.K.

### **GNSS Internal Receiver Specification:**

Type: GNSS Position Lock Number of Channels: 72 GPS/QZSS L1 C/A, GLONASS L10F, BeiDou B1 SBAS L1 C/A: WAAS, EGNOS, MSAS, GAGAN Galileo E1B/C Frequency Band: L1 (1575.42MHz) Tracking Code: C/A Code Tracking Capability: up to 24 Satellites

### Sensitivity: Tracking & Navigation Tracking & Nav: -167 dBm Cold start (aided): -157 dBm (autonomous): -148 dBm Reacquisition: -160 dBm Acquisition GPS & GLONASS Cold starts: 25sec. Warm Start: 2 sec.

GPS & BeiDou 28sec. 2sec.

# Customize outputs & optional configurations

E8-Y is a versatile GPS disciplined Oscillator that can be configured to output multiple frequencies, built-in battery backup to allow the product to be portable, NTP server module and remote access via Ethernet port (TCP port) for monitoring and control. The E8-Y can be configured to output any frequency between 1 to 100MHz of a preferred signal format. Standard connectors are BNC and SMA. Contact our sales team to specify a different output connector to suit your application.

# Standard GPS Antenna

All Quartzlock GPS frequency references are supplied with our standard GPS Antenna, Manual, Test sheet, Calibration certificate and Certificate of conformance. The standard GPS antenna has 28dB gain sufficient to provide strong GPS signal to main GPS reference unit when placed near a window or mounted outdoor.

### High Gain GPS Antenna

The High Gain GPS Antenna is designed for stationary application and all weather and harsh environment to provide a strong signal. This antenna is also a high-quality solution for adding GPS RF signals to marine GPS navigation systems. The high gain GPS antenna can be setup with up to 50 meters of cable. The high gain GPS antenna is supplied with stainless steel antenna mount. Examples of configurations

Standard GPS antenna Terminated with 5 meters of RG174 coaxial cable

#### High Gain GPS Antenna specifications

Waterproof, weatherproof Operating Temp -40°C to +85°C Gain: 35dB ±3dB Voltage: +5V Connector: TNC L1 GPS, 1575.42MHz ±1.023MHz ROHS compliant
